INFORMATION

ABOUT US

ABSOLUTE ROBOTICS is a FIRST Robotics team based at the Woodlands Secondary School in Ontario.

We are currently made up of over 100 students, teachers, and mentors who are passionate about entrepreneurship, business, engineering, and technology!

Absolute Robotics competes in the annual **FIRST ROBOTICS COMPETITION**, where we design and build a robot in six weeks to participate in an engineering challenge.

The FIRST Robotics Competition combines the excitement of sport with the rigours of science and technology to create an experience that is as close to "real world" engineering as a high school student can get.

Through FRC, our members gain invaluable hands-on experiences in the world of engineering, problem-solving and business. FRC gives students a taste of the engineering field, setting them up for a bright future.

Absolute Robotics has been very successful in recent competition seasons, achieving:

- 2018** Detroit World Championship Division Semi-Finalists
- 2019** STEMley Cup Championship Winners
- 2021** FRC International Innovation Challenge Semi-Finalists
- 2022** Second Place at STEMley Cup Championship
- 2023** FRC Sustainability Award Winners
- 2023** Ranked Top 5 Defensive Teams at Humber District Event
- 2023** FRC Provincials Qualifier

ACHIEVEMENTS

OUR VISION

Absolute Robotics strives to promote STEM within the community by creating a positive learning environment where students can pursue their passion for STEM and develop their skills in engineering, programming, design, and business.

OUR GOAL |

We want to be able to continue providing the opportunity for our community to experience what it is like to be a part of a world-class robotics team. Through lessons from senior members and mentors,

engagement in the design and building of complex mechatronic systems, and participation in exciting competitions, we want to give them skills and experiences that they wouldn't get anywhere else.

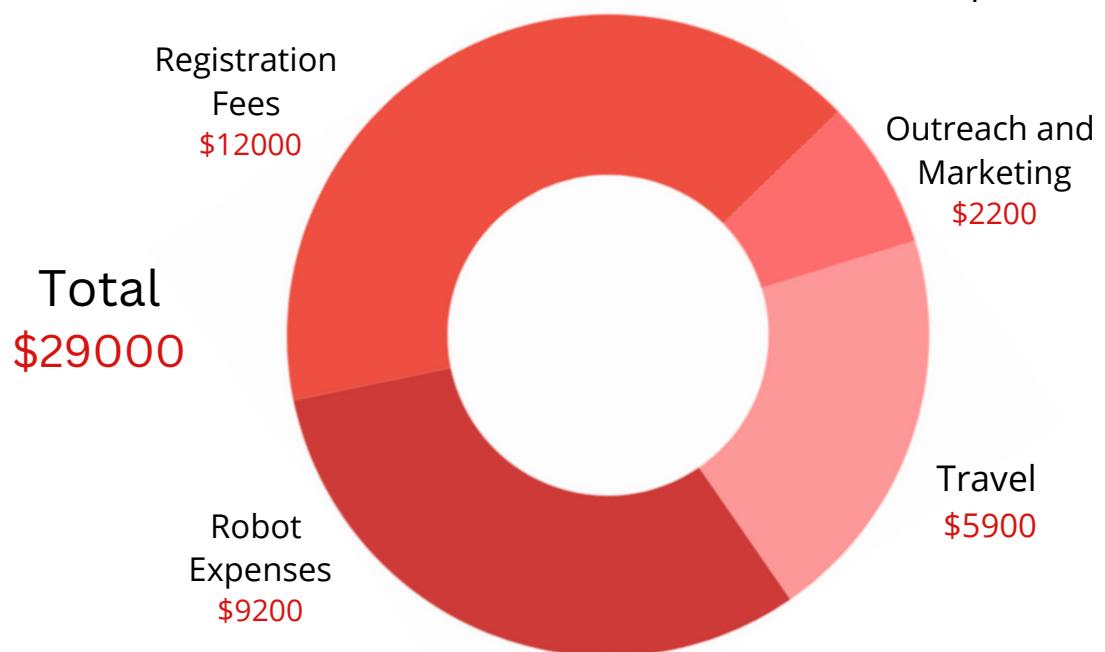

YOUR HELP

There are countless ways that you can give us a hand! The operation of an FRC team is a costly endeavor, so financial sponsorships go a long way towards helping us achieve our goals.

Non-monetary sponsorships are also greatly appreciated! This might include supplying raw materials like sheet metal and wood, providing key robot parts like electronics and pneumatics, offering machining or printing services, or catering for an event.

YOUR INVESTMENT

Any resources that you help provide will be used to help support the various activities that we do! The donations we receive are spent on many needs. Following is a breakdown of all team expenses:

Additionally, any extra money raised will go towards helping decrease the member registration costs. This will make what we do more accessible to everyone and reduce the individual financial burden on members.

SPONSORSHIP TIERS

	Bronze \$250 - \$999	Silver \$1000 - \$1999	Gold \$2000 - \$2999	Platinum \$3000 +
Name & logo on t-shirts	✓	✓	✓	✓
